Description: Cell line InCELL Hunter U2OS BCL2-BAX Protein Binding is a Cancer cell line with a species of origin Homo sapiens (Human)

Sex: Female

Disease: Osteosarcoma

Comments: Characteristics: InCELL Hunter cell lines express a transfected target protein fragment tagged with a beta-galactosidase fragment (enhanced ProLabel=ePL). The technology measures compound binding to an intracellular target by detecting changes in protein stability. The amount of fusion is quantified through the addition of substrate and a second enzyme fragment (Enzyme acceptor=EA)., Population: Caucasian.
