Proper Citation: RRID:CVCL_B6F5

Description: Cell line C8-B/Ras is a Transformed cell line with a species of origin Rattus norvegicus (Rat)

Sex: Male

Defining Citation: [PMID:11097476](#)

Comments: Characteristics: Because it has been transduced by a construct containing LoxP sites, transfection with the Cre recombinase eliminates the SV40 T gene thus reverting the cells to a non-immortal phenotype (from parent cell line C8-B)., Characteristics: Transduced with the retroviral vector SSR#69 (MoMLV/LTR-LoxP-HygroR-HSV/TK-IRES-SV40T-LoxP-Neo-MoMLV/LTR) expressing HygroR, HSV-1 TK and SV40 T-antigen flanked by two loxP sites (from parent cell line C8-B)., Characteristics: Tumorigenic.

Category: Transformed cell line

Organism: Rattus norvegicus (Rat)

Name: C8-B/Ras

Cross References: Wikidata:Q111733055

ID: CVCL_B6F5

Hierarchy: cvcl_b6f4

Record Creation Time: 20220427T215435+0000

Record Last Update: 20260905T174505+0000

Ratings and Alerts

No rating or validation information has been found for C8-B/Ras.
