Proper Citation: RRID:CVCL_IS71

Description: Cell line EndoC-betaH2 is a Conditionally immortalized cell line with a species of origin Homo sapiens (Human)

Sex: Sex unspecified

Defining Citation: [PMID:24667639](#), [PMID:26901817](#), [PMID:26909308](#)

Comments: Virology: Contains an integrated xenotropic MuLV-related virus (XMRV) Bxv-1 (PubMed=26901817)., Characteristics: The lentiviral vector insert containing the SV40 LT and hTERT can be excised by the Cre recombinase. Following excision of immortalizing transgenes, cell proliferation sharply decreases and in parallel there is a massive enhancement of beta cell-specific features such as increased INS gene expression.

Category: Conditionally immortalized cell line

Organism: Homo sapiens (Human)

Name: EndoC-betaH2

Synonyms: EndoC-BH2

Cross References: GEO:GSE48101, Wikidata:Q54832323

ID: CVCL_IS71

Record Creation Time: 20220427T215833+0000

Record Last Update: 20260905T175300+0000
