**Proper Citation:** RRID:CVCL\_KV99

**Description:** Cell line InCELL Hunter A549 GLP Methyltransferase is a Cancer cell line with a species of origin Homo sapiens (Human)

**Sex:** Male

**Disease:** Lung adenocarcinoma

**Comments:** Characteristics: InCELL Hunter cell lines express a transfected target protein fragment tagged with a beta-galactosidase fragment (enhanced ProLabel=ePL). The technology measures compound binding to an intracellular target by detecting changes in protein stability. The amount of fusion is quantified through the addition of substrate and a second enzyme fragment (Enzyme acceptor=EA)., Population: Caucasian.

**Category:** Cancer cell line

**Organism:** Homo sapiens (Human)
