Target Antigen: BIRC6 / Apollon antibody

Host Organism: goat

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: ELISA; Preliminary experiments gave no signal but low background in Human Liver and Kidney lysates at up to 1µg/ml. However this used our routine western blotting protocol which we would not expect to reliably detect proteins as large as the predicted size of approx. 555KDa according to NP_057336. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? ELISA.
