Target Antigen: Recombinant His-tagged human GFRa-4 protein produced using CHO-based cell line. For production of hGFRa-4, glycosylphosphatidyl-inositol GPI-anchor was removed and protein was secreted to the cell culture supernatant. Protein was purified by Ni-affinity chromatography following gel-filtration from cell culture supernatant.

Host Organism: chicken

Clonality: unknown

Comments: WB, IHC. A dilution of 1:5 000-1:10 000 is recommended for Western blots and 1:1 000 to 1:3 000 for immunocytochemistry. Biosensis recommends optimal dilutions/concentrations should be determined by the end user.
