Proper Citation: DEAPdataset (RRID:SCR_001586)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on December 12,2025. Multimodal dataset for emotion analysis using EEG, Physiological and Video Signals of human affective states. The electroencephalogram (EEG) and peripheral physiological signals of 32 participants were recorded as each watched 40 one-minute long excerpts of music videos. Participants rated each video in terms of the levels of arousal, valence, like/dislike, dominance and familiarity. For 22 of the 32 participants, frontal face video was also recorded. A novel method for stimuli selection was used, utilizing retrieval by affective tags from the last.fm website, video highlight detection and an online assessment tool. The dataset is made publicly available and other researchers are encouraged to use it for testing their own affective state estimation methods.

Abbreviations: DEAPdataset

Synonyms: DEAP: A Dataset for Emotion Analysis using EEG Physiological and Video Signals, DEAPDataset: A Dataset for Emotion Analysis using EEG Physiological and Video Signals

Resource Type: data or information resource, data set

Keywords: emotion, analysis, eeg, physiological, video, signal, affective state, physiological recording, video recording

Funding: European Community's Seventh Framework Program (FP7/2007-2011) grant agreement 216444;
BrainGain Smart Mix Programme ;
Swiss National Foundation for Scientific Research ;
NCCR Interactive Multimodal Information Management

Availability: THIS RESOURCE IS NO LONGER IN SERVICE.

Resource Name: DEAPdataset

Resource ID: SCR_001586

Alternate IDs: nlx_153824

Record Creation Time: 20220129T080208+0000

Record Last Update: 20260808T190541+0000

Ratings and Alerts

No rating or validation information has been found for DEAPdataset.

No alerts have been found for DEAPdataset.
