Proper Citation: STIFDB (RRID:SCR_002131)

Description: Database of biotic and abiotic stress responsive genes in Arabidopsis thaliana and Oryza sativa L. with options to identify probable Transcription Factor Binding Sites in their promoters. In the response to biotic stress like Bacteria and abiotic stresses like ABA, drought, cold, salinity, dehydration, UV-B, high light, heat, heavy metals etc, ten specific families of transcription factors in Arabidopsis thaliana and six in Oryza sativa L. are known to be involved. HMM-based models are used to identify binding sites of transcription factors belonging to these families. They have also consulted literature reports to cross-validate the Transcription Factor Binding Sites predicted by the method.

Abbreviations: STIFDB

Synonyms: Stress Responsive Transcription Factor Database

Resource Type: database, data or information resource

Defining Citation: [PMID:23314754](#), [PMID:19841686](#)

Keywords: stress responsive, transcription factor, biotic, abiotic, gene, transcription factor binding site, promoter, stress, chromosome, blast

Availability: Free, Freely Available

Resource Name: STIFDB

Resource ID: SCR_002131

Alternate IDs: OMICS_01866

Record Creation Time: 20220129T080211+0000

Record Last Update: 20260808T190339+0000

Ratings and Alerts

No rating or validation information has been found for STIFDB.

No alerts have been found for STIFDB.
