Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on October 28,2025. Project mapping whole mouse brain connectivity using serial block face scanning electron microscopy (SBF-SEM) with a specially-designed whole-brain microtome (WBM). With any luck, the whole mouse brain will be mapped ultrastructurally in the near term, which will then open the door to more serious problems; reliable automated segmentation and circuit reconstruction. These will undoubtedly require advances in machine learning methods and their application. Connectomics Software and a Multiresolution Image Viewer (MIV) is also available.

Abbreviations: Connectomes.org

Resource Type: data or information resource, data processing software, data visualization software, portal, software application, software resource, topical portal

Keywords: circuit, electron microscopy, brain, connectome, synapse, gap junction, neuron

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: Connectomes.org

Resource ID: SCR_002243

Alternate IDs: nlx_155556

Record Creation Time: 20220129T080212+0000

Record Last Update: 20260912T195538+0000
