Proper Citation: Source BioScience LifeSciences (RRID:SCR_003344)

Description: Source BioScience LifeSciences are European leaders in DNA sequencing, genomic services, bioinformatic analyses and offers a comprehensive portfolio of genomic reagents and antibodies. Source BioScience LifeScience is a CPA, GLP/GCP accredited and Illumina NGS CPro certified genomic service provider and distributes a comprehensive range of biological products to companies and institutions worldwide. Source BioScience is proud to announce that Source BioScience imaGenes has joined it's LifeSciences group. This will enable us to bring our customers one unified website with our complete range of Products, Clones and Services. We have merged our clone libraries together so that can now offer you over 20 million clones! Add to this our excellent sequencing service and our range of over 100,000 antibodies and Source BioScience LifeSciences is your ideal outsourcing partner.

Abbreviations: RZPD

Synonyms: imaGenes, Source BioScience imaGenes

Resource Type: biomaterial supply resource, material resource

Keywords: clones, libraries, microarray, dna sequencing, rna interference, next generation sequencing, proteomics

Funding:

Resource Name: Source BioScience LifeSciences

Resource ID: SCR_003344

Alternate IDs: nif-0000-31984

Record Creation Time: 20220129T080218+0000

Record Last Update: 20250430T055216+0000

Ratings and Alerts

No rating or validation information has been found for Source BioScience LifeSciences.

No alerts have been found for Source BioScience LifeSciences.

Usage and Citation Metrics

We found 65 mentions in open access literature.

Listed below are recent publications. The full list is available at [NIF](#).

Ernst D, et al. (2017) Anti-MYC-associated zinc finger protein antibodies are associated with inflammatory atherosclerotic lesions on 18F-fluorodeoxyglucose positron emission tomography. *Atherosclerosis*, 259, 12.

Goetze RW, et al. (2017) A CRISPR/Cas9 approach reveals that the polymerase activity of DNA polymerase ϵ is dispensable for HIV-1 infection in dividing and nondividing cells. *The Journal of biological chemistry*, 292(34), 14016.

Robertson HE, et al. (2017) The mitochondrial genomes of the acoelomorph worms *Paratomella rubra*, *Isodiametra pulchra* and *Archaphanostoma ylvae*. *Scientific reports*, 7(1), 1847.

Hollenbaugh JA, et al. (2017) Substrates and Inhibitors of SAMHD1. *PloS one*, 12(1), e0169052.

Sui Y, et al. (2017) Paradoxical myeloid-derived suppressor cell reduction in the bone marrow of SIV chronically infected macaques. *PLoS pathogens*, 13(5), e1006395.

Herschhorn A, et al. (2017) The ϵ 20- ϵ 21 of gp120 is a regulatory switch for HIV-1 Env conformational transitions. *Nature communications*, 8(1), 1049.

Vargas-Inchaustegui DA, et al. (2016) Evaluation of Functional NK Cell Responses in

Vaccinated and SIV-Infected Rhesus Macaques. *Frontiers in immunology*, 7, 340.

Yuan T, et al. (2016) An HIV-1 capsid binding protein TRIM11 accelerates viral uncoating. *Retrovirology*, 13(1), 72.

Chevalier B, et al. (2015) miR-34/449 control apical actin network formation during multiciliogenesis through small GTPase pathways. *Nature communications*, 6, 8386.

Marchesin V, et al. (2015) ARF6-JIP3/4 regulate endosomal tubules for MT1-MMP exocytosis in cancer invasion. *The Journal of cell biology*, 211(2), 339.

Hollevoet K, et al. (2015) Methylation-associated partial down-regulation of mesothelin causes resistance to anti-mesothelin immunotoxins in a pancreatic cancer cell line. *PLoS one*, 10(3), e0122462.

Bagley K, et al. (2015) The catalytic A1 domains of cholera toxin and heat-labile enterotoxin are potent DNA adjuvants that evoke mixed Th1/Th17 cellular immune responses. *Human vaccines & immunotherapeutics*, 11(9), 2228.

Bergamaschi C, et al. (2015) Intramuscular delivery of heterodimeric IL-15 DNA in macaques produces systemic levels of bioactive cytokine inducing proliferation of NK and T cells. *Gene therapy*, 22(1), 76.

Mousseau G, et al. (2015) The Tat Inhibitor Didehydro-Cortistatin A Prevents HIV-1 Reactivation from Latency. *mBio*, 6(4), e00465.

Valentin A, et al. (2015) Dose-dependent inhibition of Gag cellular immunity by Env in SIV/HIV DNA vaccinated macaques. *Human vaccines & immunotherapeutics*, 11(8), 2005.

Tuero I, et al. (2015) Mucosal B Cells Are Associated with Delayed SIV Acquisition in Vaccinated Female but Not Male Rhesus Macaques Following SIVmac251 Rectal Challenge. *PLoS pathogens*, 11(8), e1005101.

Mothe B, et al. (2015) A human immune data-informed vaccine concept elicits strong and broad T-cell specificities associated with HIV-1 control in mice and macaques. *Journal of translational medicine*, 13, 60.

Leung-Theung-Long S, et al. (2015) A Novel MVA-Based Multiphasic Vaccine for Prevention or Treatment of Tuberculosis Induces Broad and Multifunctional Cell-Mediated Immunity in Mice and Primates. *PLoS one*, 10(11), e0143552.

Banerjee A, et al. (2014) Human protein Staufen-2 promotes HIV-1 proliferation by positively regulating RNA export activity of viral protein Rev. *Retrovirology*, 11, 18.

Mauri F, et al. (2014) The conserved discs-large binding partner Banderuola regulates asymmetric cell division in *Drosophila*. *Current biology : CB*, 24(16), 1811.
