Proper Citation: NIH Toolbox Pattern Comparison Processing Speed Test (RRID:SCR_003623)

Description: Assessment test that measures speed of processing by asking participants to discern whether two side-by-side pictures are the same or not. Participants' raw score is the number of items correct in a 90-second period. The items are designed to be simple to most purely measure processing speed. The test overall takes approximately 3 minutes to administer. This test is recommended for ages 7-85, but is available for use as young as age 3, if requested.
