Proper Citation: University Andrology Laboratory (RRID:SCR_004901)

Description: The University Andrology Laboratory provides physicians and their patients with all forms of male infertility testing, as well as operating a Patient Sperm Banking Program. This full-service facility is dedicated to the diagnosis and treatment of the infertile male using the highest standard of quality of care. Patients can either visit the main laboratory facility on the University of Illinois at Chicago Medical Center campus or visit our satellite laboratory on North Michigan Avenue. Now available through the University Andrology Laboratory is the OverNiteMale Program. The OverNiteMale Program is particularly convenient for patients who are unable to make a personal visit to one of our laboratories to produce a sample. Patients can now produce a sample in the privacy of their own home from any location in the U.S.A. and send it via Federal Express directly to our laboratory. In-patients can also take advantage of the OverNiteMale™ Program during their hospital stay. The University Andrology Laboratory was originally introduced at Michael Reese Hospital in Chicago in 1982 and relocated in 1996 to the University of Illinois at Chicago Medical Center, Department of Urology. The laboratory meets the highest standard of quality control and quality assurance. The operation of the University Andrology Laboratory has been under the direction of Gail S. Prins, Ph.D., HCLD, from its inception to the present.
