Proper Citation: KGGSeq (RRID:SCR_005311)

Description: A biological Knowledge-based mining platform for Genomic and Genetic studies using Sequence data. The software platform, constituted of bioinformatics and statistical genetics functions, makes use of valuable biologic resources and knowledge for sequencing-based genetic mapping of variants / genes responsible for human diseases / traits. It facilitates geneticists to fish for the genetic determinants of human diseases / traits in the big sea of DNA sequences. KGGSeq has paid attention to downstream analysis of genetic mapping. The framework was implemented to filter and prioritize genetic variants from whole exome sequencing data.

Abbreviations: KGGSeq

Synonyms: KGGSeq: A biological Knowledge-based mining platform for Genomic and Genetic studies using Sequence data

Resource Type: software resource

Defining Citation: [PMID:22241780](#)

Keywords: genomic, genetic, sequence, mutation, exome sequencing, disease, gene, variant, bio.tools

Related Condition: Monogenic disorder, Cancer

Resource Name: KGGSeq

Resource ID: SCR_005311

Alternate IDs: biotools:kggseq, OMICS_02260

Alternate URLs: <https://bio.tools/kggseq>

Record Creation Time: 20220129T080229+0000

Record Last Update: 20260815T182313+0000

Ratings and Alerts

No rating or validation information has been found for KGGSeq.

No alerts have been found for KGGSeq.
