**Proper Citation:** Neuroscience and Psychiatry Module 1: Translating Neural Circuits into Novel Therapeutics (RRID:SCR\_005609)

**Description:** This is the first in a series of modules on neuroscience and psychiatry. This module explores research on cognitive deficits, a core feature of schizophrenia and the single best predictor of functional outcomes in this disorder for which we currently have no treatments. This module is an example of how translational neuroscience can provide clues for the development of promising novel therapeutics.

**Abbreviations:** Neuroscience and Psychiatry Module 1, Neuroscience and Psychiatry Module, Neuroscience Psychiatry Module

**Synonyms:** Neuroscience and Psychiatry Module 1 - Translating Neural Circuits into Novel Therapeutics, Translating Neural Circuits into Novel Therapeutics, Neuroscience Psychiatry Module 1: Translating Neural Circuits into Novel Therapeutics

**Resource Type:** video resource, narrative resource, training material, data or information resource

Keywords: neuroscience, psychiatry, neural circuit, therapeutics, schizophrenia
