Proper Citation: Scansite (RRID:SCR\_007026)

**Description:** Scansite searches for motifs within proteins that are likely to be phosphorylated by specific protein kinases or bind to domains such as SH2 domains, 14-3-3 domains or PDZ domains. The Motifscanner program utilizes an entropy approach that assesses the probability of a site matching the motif using the selectivity values and sums the logs of the probability values for each amino acid in the candidate sequence. The program then indicates the percentile ranking of the candidate motif in respect to all potential motifs in proteins of a protein database. When available, percentile scores of some confirmed phosphorylation sites for the kinase of interests or confirmed binding sites of the domain of interest are provided for comparison with the scores of the candidate motifs.

Synonyms: Scansite

Resource Type: data or information resource, database

Keywords: binding, kinase, phosphorylate, protein, bio.tools, FASEB list

Funding:

Resource Name: Scansite

Resource ID: SCR\_007026

Alternate IDs: biotools:scansite, nif-0000-20914

Alternate URLs: https://bio.tools/scansite

**Record Creation Time:** 20220129T080239+0000

**Record Last Update:** 20250507T060446+0000

## Ratings and Alerts

No rating or validation information has been found for Scansite.

No alerts have been found for Scansite.
