Bovine Genome Project

RRID:SCR_008370

Type: Tool

Proper Citation

Bovine Genome Project (RRID:SCR_008370)

Resource Information

URL: <http://www.hgsc.bcm.tmc.edu/content/bovine-genome-project>

Proper Citation: Bovine Genome Project (RRID:SCR_008370)

Description: Downloadable files of the bos taurus genome. Draft assemblies available for download as contigs or linearized scaffolds of the genomic sequence of cow, Bos taurus, including the final draft assembly (7.1 coverage) and the two previous assemblies. The genome is sequenced to 6- to 8-fold sequence depth, with high-quality finished sequence in some areas. Accompanying EST and SNP analyses is also included. The bovine genome assembly and analysis and the study of cattle genetic history were published in April 24, 2009 issue of Science. The Human Genome Sequencing Center provides BLAST searches of the genome assemblies, either as contigs or as linearized chromosome sequences. The WGS sequence enriched BAC assemblies and the unassembled reads (sequencing reads that did not end up in the genome assembly) can also be searched by BLAST. Traces are available from the NCBI Trace Archive by using the link in the sidebar or by using NCBI MegaBLAST with a same species or cross species query.

Abbreviations: Bovine Genome Project

Resource Type: production service resource, service resource, data analysis service, data or information resource, analysis service resource, data set

Defining Citation: [PMID:19393050](#)

Keywords: bovine, cattle, cow, genome, genotype, reagent, sequencing, blast, genome assembly, contig, linearized chromosome, single nucleotide polymorphism, bac map, expressed sequence tag
