Proper Citation: Cytopathology Foundation (RRID:SCR_008467)

Description: Cytopathology Foundation is a non-profit organization dedicated to the health care for the advancement of art and science of Cytopathology dealing with study of cells for proper disease management especially cancer. Cytopathology is a well established diagnostic sub-specialty of pathology. Instead of using surgically removed tissue to arrive at a diagnosis it attempts to identify diagnostic and prognostic information from dispersed cells obtained by non-invasive or minimally invasive techniques. An example, and its greatest success story thus far, is the role it has played in the battle with cervical cancer. The introduction of the Pap smear has contributed immensely to the early diagnosis and significantly decreased mortality of cervical cancer. Activities of the foundation 1. Support the mission statement in general. 2. Support the editorial and publication expenses of CytoJournal. 3. Future activities may include publication and marketing of cytopathology related literature, to generate funds. 4. Support any other scholarly activities in Cytopathology and related areas.
