Proper Citation: HMS East Quad NMR Core Facility (RRID:SCR_009795)

Description: Core facility that provides the following services: Small molecule and peptide NMR spectrometry service. Formerly the NERCE NMR Resource. Nuclear magnetic resonance spectroscopy is a powerful tool for studying structural and conformational parameters of molecules. This tool is vital for the chemical analysis of both small molecules (like those discovered in small-molecule screens) and large molecules, such as carbohydrates and proteins found to have potential biologic importance.
