**Proper Citation:** LCRC Proteomics Core Facility (RRID:SCR\_009894)

**Description:** Core facility that provides the following services: Mass spectrometry services. The mission of Proteomics Core Facility is to help researchers advance their biomedical research programs. The Facility is equipped with gel electrophoresis units, image analyzers and digitizers, and robotics for mass spectrometry sample preparation. Currently, a Matrix-Assisted Laser Desorption/Ionization Mass Spectrometer instrument implements protein identification. The various applications include the studies of protein expression profile, posttranslational modifications, and partial sequencing of novel proteins. The staff also consult with researchers about their particular research interests and assist with the development of specific applications and solution to problems.

**Resource Type:** access service resource, service resource, core facility
