Proper Citation: OHSU Biomedical Informatics Shared Resource (RRID:SCR_009966)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on December 6, 2022. Core facility that provides the following services: Data storage planning, Database design and development, Website development. The BMISR provides expertise in data collection and management to clinical researchers. Through effective trial management and innovative data collection, clinical trial efficiency can be improved and high quality data collected for analysis. This automated data collection, storage and reporting reduce data errors and save time and effort during collection and analysis. Consultation and services are available during every stage of the research process--from grant proposal writing through research data collection, management and analysis. We can provide custom applications for data collection, management and dissemination using a broad array of technologies and tools. We can help with standalone database applications (such as Access), using scannable paper forms, developing web applications, designing database applications, just to name a few.

Resource Type: core facility, access service resource, service resource

Keywords: data storage, database development, web programming
