Proper Citation: Penn Flow Cytometry and Cell Sorting Resource Laboratory (RRID:SCR_010011)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on June 1,2023. Core facility that provides the following services: Flow cytometry analysis service, Cell sorting and analysis service, Flow cytometer analyzer access, Introductory flow cytometry training, Advanced and customized flow cytometry training, Flow cytometry consultation service, FACSAria training, Flow cytometry data analysis, BSL2+ biohazardous human cell sorting, BSL2+ murine biohazardous cell sorting, BSL2+ murine cell sorting access, Non-infectious cell sorting access. The Flow Cytometry and Cell Sorting Resource Laboratory is currently recognized as one of the largest and most comprehensive flow cytometry laboratories in the US. In 2010 it was designated a laboratory of exceptional merit by the National Cancer Institute. Using state-of-the-art technology, the resource provides a broad array of, instrumentation, support, education and consultation to the research community at the University of Pennsylvania. A wide variety of cell sorting applications are supported, from high-speed multicolor (up to 14 colors) cell sorting to low-speed, large nozzle, improved viability sorting. Additionally, a wide variety of cell analysis services (up to 20 parameters) are offered, from traditional analog, easier to use tabletop analyzers to many-laser, many-color, high-speed, fully-digital modern instrumentation. Currently the facility offers 6 cell sorters and 19 analytical instruments. A very active training and consultation program is in place to support these activities. The Scientific Director, Dr. Jonni Moore, and the Technical Director, each have over 25 years experience in the field of cytomics. Researchers at the University of Pennsylvania are increasingly engaged in research projects that require 8-plus-parameter cell sorting of infectious cells and primary human tissues. Investigators using the Flow Cytometry and Cell Sorting Shared Resource have access to

virtually any type of cytometric services required for a vast array of applications.

Resource Type: service resource, core facility, access service resource

Keywords: flow cytometry assay, cell separation, fluorescence activated cell sorting (facs), data analysis

Funding:

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: Penn Flow Cytometry and Cell Sorting Resource Laboratory

Resource ID: SCR_010011

Alternate IDs: nlx_156478

Record Creation Time: 20220129T080256+0000

Record Last Update: 20250419T055239+0000

Ratings and Alerts

No rating or validation information has been found for Penn Flow Cytometry and Cell Sorting Resource Laboratory.

No alerts have been found for Penn Flow Cytometry and Cell Sorting Resource Laboratory.
