Proper Citation: UTHSCSA X-ray Crystallography Core Laboratory (RRID:SCR_012242)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on April 15, 2024. The mission of the X-ray Crystallography Core Laboratory is to provide state-of-the-art resources to researchers at the University of Texas Health Science Center at San Antonio, and to external users, enabling the detailed 3-D analyses of biological macromolecules that play important roles in human health. This is a full service core in that it not only offers access to sophisticated equipment and technologies but also offers advice and technical assistance in sample preparation. Services are also provided to investigators without funding to facilitate the development of pilot data for new potentially fundable projects, as core resources permit. If priority of usage becomes an issue, this will be decided by the Core Director in consultation with the other principal scientists based on the feasibility of the projects, their scientific merits and their relevance to human health.

Abbreviations: UTHSCSA X-ray Crystallography Core Laboratory

Synonyms: University of Texas Health Science Center at San Antonio X-ray

Crystallography Core Laboratory

Resource Type: service resource, core facility, access service resource
