Description: This is an exciting time at The Ohio State University Medical Center. By every measure, we're an organization on the move -- a rise that is reflected in our national rankings. Currently ranked 27th in the 2010 U.S. News & World Report's America's Best Graduate Schools, the OSU College of Medicine has made one of the greatest leaps in rankings history, gaining 17 positions since 2003 among public and private medical colleges and schools of osteopathic medicine. Great as that is, rankings alone do not tell the whole story. More than 170 of our faculty are listed in Best Doctors in America, and Ohio State has led the nation three years in a row in the number of faculty elected to the American Association for the Advancement of Science. We've embarked on a massive 15-year construction program that will set the standard for academic medical centers of the future, creating dramatic and dynamic research, clinical and learning environments. And we're becoming a world leader in advancing personalized health care, a revolutionary new brand of healthcare delivery based on each person's unique biological, behavioral and environmental characteristics. We invite you to take some time to explore our Web site to learn more about the great things happening here at The Ohio State College of Medicine.
