Description: A software application which enables the visualization of datasets obtained from Confocal Laser Scanning Microscopy (CLSM). P-View allows users to interact with a pre-computed model using a flight simulator type interface. The program makes use of several optimizations to allow visualization of large objects using standard PC workstation hardware, including the speed up techniques Level of Detail and Frustum Culling. The current version of this software is Version 1.2.1, last updated on October 1, 2002.
