Proper Citation: Predicting Response to Standardized Pediatric Colitis Therapy (PROTECT) (RRID:SCR_014374)

Description: A study of how children newly diagnosed with ulcerative colitis (UC) respond to mesalamine and prednisone (corticosteroid), the standard initial therapies used to treat this disorder. Over a period of 5 years PROTECT will prospectively study the course of 430 children newly diagnosed with UC who are treated with standardized care. Biospecimens (blood, stool, colonic biopsy tissue) will be obtained and used to better understand the effects of genetics, mechanisms of inflammation, Vitamin D, and the bacteria contained in the stool (microbiome) on clinical outcomes.

Abbreviations: PROTECT

Synonyms: Predicting Response to Standardized Pediatric Colitis Therapy

Resource Type: data or information resource, data set, resource, topical portal, portal

Keywords: ulcerative colitis, children, mesalamine, prednisone, genetics, inflammation, vitamin d, clinical outcome

Related Condition: ulcerative colitis

Funding: NIDDK

Availability: Authorization required for further access

Resource Name: Predicting Response to Standardized Pediatric Colitis Therapy (PROTECT)

Resource ID: SCR_014374

Alternate URLs: <http://www.niddk.nih.gov/research-funding/research-resources/Pages/default.aspx>

Record Creation Time: 20220129T080320+0000

Record Last Update: 20260819T044359+0000

Ratings and Alerts

No rating or validation information has been found for Predicting Response to Standardized Pediatric Colitis Therapy (PROTECT) .

No alerts have been found for Predicting Response to Standardized Pediatric Colitis Therapy (PROTECT) .
