Proper Citation: 10x Genomics: Chromium Controller Genetic Analyzer (RRID:SCR_019326)

Description: Genetic analyzer, referred to as Chromium Controller for combining large partition numbers with a diverse barcode library to generate >100,000 barcode-containing partitions. Chromium Controller runs low- and standard-throughput assays. It does not run high-throughput assays. Chromium Controller uses advanced microfluidics to perform single cell partitioning and barcoding in a matter of minutes. Powered by Next GEM technology, the Chromium Controller enables integrated analysis of single cells at massive scale.

Resource Type: instrument resource
