Proper Citation: CyTekBio: Aurora Spectral Analyzer (RRID:SCR_019826)

Description: Analyzer with up to five lasers, three scattering channels, and 64 fluorescence channels, the Aurora suits every laboratory's needs, from to high complexity applications. A paradigm shifting optical design provides unprecedented flexibility, enabling the use of a wide array of new fluorochrome combinations without reconfiguring your system for each application. The state-of-the-art optics and low-noise electronics provide excellent sensitivity and resolution. Flat-top beam profiles, combined with a ly designed fluidics system, translate to outstanding performance at high sample flow rates.
