**Proper Citation:** Cincinnati Children's Hospital Cell Processing Core Facility (RRID:SCR\_022623)

**Description:** Supplies mononuclear cells, stem cells or other enriched cell populations. Provides stem cells and other tissue samples from normal donor or patient populations such as disease specific repositories or specific research studies requiring sample processing. Samples are provided fresh or cryopreserved according to availability, unprocessed or with further lab processing. Common processing techniques include PBMC isolation, Serum and plasma isolation, Separation of marker specific populations, Flow cytometric characterization of samples, Interferon gamma EliSpot. Additional services may be available upon request
