## **SCAN.UPC**

RRID:SCR\_001334

Type: Tool

### **Proper Citation**

SCAN.UPC (RRID:SCR\_001334)

#### **Resource Information**

URL: http://www.bioconductor.org/packages/release/bioc/html/SCAN.UPC.html

**Proper Citation:** SCAN.UPC (RRID:SCR\_001334)

**Description:** A microarray normalization software (SCAN) to facilitate personalized-medicine workflows with an extension (UPC) that estimates whether a given gene/transcript is active above background levels in a given sample. Rather than processing microarray samples as groups, which can introduce biases and present logistical challenges, SCAN normalizes each sample individually by modeling and removing probe- and array-specific background noise using only data from within each array. SCAN can be applied to one-channel (e.g., Affymetrix) or two-channel (e.g., Agilent) microarrays. The UPC method can be applied to one-channel or two-channel microarrays as well as to RNA-Seq read counts. Because UPC values are represented on the same scale and have an identical interpretation for each platform, they can be used for cross-platform data integration. A

**Abbreviations: SCAN.UPC** 

**Synonyms:** Single-channel array normalization (SCAN) and Universal exPression Codes (UPC), Single-channel array normalization and Universal exPression Codes

**Resource Type:** software resource

**Keywords:** microarray, one channel, preprocessing, rna-seq, two channel

**Funding:** 

Availability: MIT License

Resource Name: SCAN.UPC

Resource ID: SCR\_001334

Alternate IDs: OMICS\_02006

**Record Creation Time:** 20220129T080206+0000

**Record Last Update:** 20250420T014026+0000

### Ratings and Alerts

No rating or validation information has been found for SCAN.UPC.

No alerts have been found for SCAN.UPC.
