BioCyc

RRID:SCR_002298

Type: Tool

Proper Citation

BioCyc (RRID:SCR_002298)

Resource Information

URL: <http://biocyc.org/>

Proper Citation: BioCyc (RRID:SCR_002298)

Description: A collection of Pathway/Genome Databases which describes the genome and metabolic pathways of a single organism. The BioCyc collection of Pathway/Genome Databases (PGDBs) provides an electronic reference source on the genomes and metabolic pathways of sequenced organisms. BioCyc PGDBs are generated by software that predicts the metabolic pathway complements of completely sequenced organisms from their genome sequences. They also include the results of a number of other computational inference procedures applied to these genomes, including predictions of which genes code for missing enzymes in metabolic pathways, and predicted operons. The BioCyc Web site provides a suite of software tools for database searching and visualization, for omics data analysis, and for comparative genomics and comparative pathway questions. The databases within the BioCyc collection are organized into tiers according to the amount of manual review and updating they have received. Tier 1 PGDBs have been created through intensive manual efforts, and receive continuous updating. Tier 2 PGDBs were computationally generated by the PathoLogic program, and have undergone moderate amounts of review and updating. Tier 3 PGDBs were computationally generated by the PathoLogic program, and have undergone no review and updating. There are 967 DBs in Tier 3. The downloadable version of BioCyc that includes the Pathway Tools software provides more speed and power than the BioCyc Web site.

Synonyms: BioCyc Database Collection

Resource Type: database, data or information resource

Defining Citation: [PMID:16246909](#)

Keywords: database, pathway/genome databases, PGDB, genome, metabolic pathway, microbiome, FASEB list

Funding: NIGMS GM080746

Availability: Restricted

Resource Name: BioCyc

Resource ID: SCR_002298

Alternate IDs: nif-0000-00369, r3d100011259
