Proper Citation: Genevestigator (RRID:SCR_002358)

Description: A high performance search engine for gene expression that integrates thousands of manually curated public microarray and RNAseq experiments and nicely visualizes gene expression across different biological contexts (diseases, drugs, tissues, cancers, genotypes, etc.). There are two basic analysis approaches: # for a gene of interest, identify which conditions affect its expression. # for condition(s) of interest, identify which genes are specifically expressed in this/these conditions. Genevestigator builds on the deep integration of data, both at the level of data normalization and on the level of sample annotations. This deep integration allows scientists to ask new types of questions that cannot be addressed using conventional tools.

Abbreviations: Genevestigator

Resource Type: analysis service resource, commercial organization, data analysis service, data or information resource, database, production service resource, service resource

Keywords: gene, genetic, animal, development, disease, meta-analysis, regulation, stage, microarray, rnaseq, visualization, gene expression, disease, drug, tissue, cancer, genotype, pharma, biomedical, conditions, genotype, anatomy, neoplasm, chemical, hormone, infection, model organism, organ, cell type, cell line, target, biomarker, similarity, FASEB list

Availability: 4 products:, Free, Free for academic use, Account required, Paid subscription, Local installation

Resource Name: Genevestigator

Resource ID: SCR_002358

Alternate IDs: nif-0000-21172, OMICS_00763

Record Creation Time: 20220129T080213+0000

Record Last Update: 20260821T193640+0000

Ratings and Alerts

No rating or validation information has been found for Genevestigator.

No alerts have been found for Genevestigator.
