Proper Citation: Arbor Research Collaborative for Health (RRID:SCR_003972)

Description: A not-for-profit research organization committed to improve patient care through research that shapes medical policies and practice. In particular, they conduct health outcomes research on chronic disease and end-stage organ failure, with expertise in biostatistical analysis, clinical practice, health economics, public policy, database management and integration, and project coordination. Through research projects that are national and global in scope, their scientific collaborations provide valuable and timely information to the worldwide health care community. They are a leader in interdisciplinary health outcomes and policy research focused on reducing the health and economic burden of chronic diseases and improving the delivery of care.
