Proper Citation: Bremen Cancer Registry (RRID:SCR_004093)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on January 9, 2023. A population based database collecting incident cases of cancer diagnosed since January 1998 in the population of the Federal state of Bremen. The Registry provides data for the analysis of * age specific time trends and geographical patterns of cancer incidence in men and women * cancer causes (e.g. work-related, environmental and personal risk factors) * epidemiological evaluation of screening programs * survival analysis of cancer patients. Since the incidence year of 2001, the Registry has a completeness level of > 95 %, based on expected values provided by the Robert Koch Institute.

Abbreviations: BKR

Synonyms: Bremer Krebsregister
