**Description:** THIS RESOURCE IS NO LONGER IN SERVICE, documented August 31, 2016. The Dana-Farber/Harvard Cancer Center Pathology Specimen Locator (PSL) is a core developed to facilitate translational research requiring human specimens. The PSL is a distributed network of databases containing de-identified pathology reports and other specimen information from IRB-approved repositories within Dana-Farber/Harvard Cancer Center affiliated institutions. Using the PSL, researchers can work with the pathology departments to find appropriate specimens for their research. The Harvard VLS currently contains approximately two million de-identified pathology reports from the four main Harvard Teaching Hospitals.
