Proper Citation: American Society for Investigative Pathology (RRID:SCR_005426)

Description: The American Society for Investigative Pathology (ASIP) is a society of biomedical scientists who investigate mechanisms of disease. Investigative pathology is an integrative discipline that links the presentation of disease in the whole organism to its fundamental cellular and molecular mechanisms. It uses a variety of structural, functional, and genetic techniques and ultimately applies research findings to the diagnosis and treatment of diseases. ASIP advocates for the practice of investigative pathology and fosters the professional career development and education of its members. The mission of the Society is to promote the discovery, advancement, and dissemination of basic and translational knowledge in experimental pathology and related disciplines. This shall be achieved by fostering investigation into the pathogenesis, classification, diagnosis, and manifestations of disease through meetings, publications, and educational activities. ASIP welcomes basic and clinical biomedical research scientists as active members.

Abbreviations: ASIP

Synonyms: American Society for Investigative Pathology (ASIP)

Resource Type: professional organization

Keywords: pathology, research

Resource Name: American Society for Investigative Pathology

Resource ID: SCR_005426

Alternate IDs: grid.422551.5, ISNI: 0000 0001 0940 3322, Wikidata: Q4745022, nlx_144520
