Proper Citation

High-dose Ursodiol Therapy of Primary Sclerosing Cholangitis (RRID:SCR_006772)

Resource Information

URL: <http://clinicaltrials.gov/show/NCT00059202>

Proper Citation: High-dose Ursodiol Therapy of Primary Sclerosing Cholangitis (RRID:SCR_006772)

Description: Multi-center, placebo-controlled trial of ursodiol in primary sclerosing cholangitis (PSC). A total of 150 patients with previously untreated PSC without cirrhosis were randomly assigned to receive high doses of ursodiol (20-25 mg/kg/day) or placebo for two years. Patients underwent medical evaluation, endoscopic retrograde cholangiography, and liver biopsy before randomization and again at two-year intervals. The endpoints of therapy were progression of hepatic fibrosis, liver decompensation, liver transplantation, or death. The treatment phase of the study was stopped for futility in June 2008; however, patients continue to be followed. Ongoing mechanistic studies are underway.

Abbreviations: HUSC

Synonyms: Trial of High-dose Urso in Primary Sclerosing Cholangitis, High-dose Ursodiol Therapy of Primary Sclerosing Cholangitis (HUSC), Multicentered Randomized Trial of High-dose Urso in Primary Sclerosing Cholangitis

Resource Type: resource, clinical trial

Defining Citation: [PMID:19585548](#)

Keywords: treatment, placebo, ursodeoxycholic acid, intervention, randomized, adult human, male, female

Related Condition: Primary Sclerosing Cholangitis

Funding: NIDDK

Resource Name: High-dose Ursodiol Therapy of Primary Sclerosing Cholangitis

Resource ID: SCR_006772

Alternate IDs: nlx_152836

Record Creation Time: 20220129T080238+0000

Record Last Update: 20250425T055548+0000

Ratings and Alerts

No rating or validation information has been found for High-dose Ursodiol Therapy of Primary Sclerosing Cholangitis .
