Description: Accepts and provides access to biogeographic data collected throughout the global oceans. The datasets are integrated so you can search them all seamlessly by species name, higher taxonomic level, geographic area, depth, and time; and then map and find environmental data related to the locations. Created by the Census of Marine Life, OBIS is now part of the Intergovernmental Oceanographic Commission (IOC) of UNESCO, under its International Oceanographic Data and Information Exchange (IODE) programme

Abbreviations: OBIS

Synonyms: Ocean Biogeographic Information System Marine

Resource Type: data or information resource, data repository, database, service resource, storage service resource

Keywords: ocean, marine, data set, oceanography, FASEB list

Availability: The community can contribute to this resource

Resource Name: OBIS

Resource ID: SCR_006933
