Focal Segmental Glomerulosclerosis in Children and Young Adults Interventional Study (RRID:SCR\_007130)

## **Resource Information**

URL: http://archives.niddk.nih.gov/patient/fsgs/fsgs.aspx

**Proper Citation:** Focal Segmental Glomerulosclerosis in Children and Young Adults Interventional Study (RRID:SCR\_007130)

**Description:** Network of collaborative research centers that tested the effects of treatment with cyclosporine to treatment with mycophenalate mofetil combined with oral pulse dexamethasone in children and young adults with focal segemental glomerulosclerosis. Efficacy was assessed in terms of induction of remission of proteinuria after 52 weeks of treatment and sustained remission after 26 weeks off treatment. The clinical sites were State University of New York, Stony Brook; Montefiore Medical Center; Seattle Children'''s Medical Center; Medical City Dallas Hospital; and the University of North Carolina. The Cleveland Clinic is the data-coordinating center, and NephCure will fund ancillary studies.

Abbreviations: FSGS in Children and Young Adults Interventional Study

**Synonyms:** Focal Segmental Glomerulosclerosis Clinical Trial, Focal Segmental Glomerulosclerosis Clinical Trial (FSGS-CT), Focal Segmental Glomerulosclerosis (FSGS) Clinical Trial, Focal Segmental Glomerulosclerosis (FSGS) in Children and Young Adults Interventional Study

Resource Type: resource, clinical trial

**Keywords:** child, early adult, young human, proteinuria, kidney disease, intervention, prednisone, cyclosporine, mycophenalate mofetil, dexamethasone, cyclosporine-a, male, female

**Related Condition:** Focal Segmental Glomerulosclerosis, Focal Segmental Glomerulosclerosis Nephrotic Syndrome

Funding: NIDDK

**Resource Name:** Focal Segmental Glomerulosclerosis in Children and Young Adults Interventional Study

Resource ID: SCR\_007130

Alternate IDs: nlx\_152826
