Proper Citation: AIDS.gov Blog (RRID:SCR_007156)

Description: The AIDS.gov blog serves as a forum to foster public discussion on using new media effectively in response to HIV/AIDS, as well as HIV/AIDS research and policies. Along with weekly new media posts, the blog features other AIDS.gov-authored posts, guest posts, cross-posts from the White House Office of National AIDS Policy blog and the CDC Health Protection Perspectives blog, PEPFAR blog, and posts from the National Institute of Allergies and Infectious Diseases" (NIAID) Division of AIDS. A large number of Federal agencies and programs are engaged in HIV/AIDS prevention, testing, treatment, policy, and research efforts in the United States. AIDS.gov serves as a gateway for information about these Federal efforts, with a focus on domestic programs. Since the launch of AIDS.gov on December 1, 2006 (World AIDS Day), there has been a growing interest in using new media tools to disseminate information about HIV/AIDS and improve prevention, testing, treatment, and research outcomes. AIDS.gov created this blog to address that interest, and has since expanded content areas to include key US Government HIV/AIDS-related research and policy posts, among other topics.
