Proper Citation: University of California Santa Cruz, Department of Molecular, Cell and Developmental Biology (RRID:SCR_007497)

Description: The Department of Molecular, Cell & Developmental Biology (MCD), with 20 faculty members, focuses on fundamental problems in the molecular, cell and developmental biology of animals and plants. The scope of research conducted in this group spans the broad range of modern biological research; from classical and molecular genetics to biochemistry and molecular biology. Research laboratories in the MCD Biology Department use both simple model organisms and vertebrate systems to study important biological processes, ranging from the mechanism of protein synthesis to the development and function of the nervous system.
