## MuIPSSM

RRID:SCR\_007812

Type: Tool

### Proper Citation

MuIPSSM (RRID:SCR\_007812)

### Resource Information

**URL:** <http://crick.mbu.iisc.ernet.in/~mulpssm>

**Proper Citation:** MuIPSSM (RRID:SCR\_007812)

**Description:** A database of multiple position specific scoring matrices of protein domain families with constant alignments. Representation of multiple sequence alignments of protein families in terms of position-specific scoring matrices (PSSMs) is commonly used in the detection of remote homologues. A PSSM is generated with respect to one of the sequences involved in the multiple sequence alignment as a reference. We have shown recently that the use of multiple PSSMs corresponding to an alignment, with several sequences in the family used as reference, improves the sensitivity of the remote homology detection dramatically. MuIPSSM contains PSSMs for a large number of sequence and structural families of protein domains with multiple PSSMs for every family. The approach involves use of a clustering algorithm to identify most distinct sequences corresponding to a family. With each one of the distinct sequences as reference, multiple PSSMs have been generated. The current release of MuIPSSM contains ~33 000 and ~38 000 PSSMs corresponding to 7868 sequence and 2625 structural families. A RPS\_BLAST interface allows sequence search against PSSMs of sequence or structural families or both. An analysis interface allows display and convenient navigation of alignments and domain hits.

**Synonyms:** MuIPSSM

**Resource Type:** data or information resource, database

**Resource Name:** MuIPSSM

**Resource ID:** SCR\_007812

**Alternate IDs:** nif-0000-03172

**Record Creation Time:** 20220129T080243+0000

**Record Last Update:** 20260829T183014+0000
