Proper Citation: George Washington University Medical Center Pharmacogenomics Program (RRID:SCR_007994)

Description: George Washington University is a pioneer in the field of pharmacogenomics offering the only Bachelor's degree program in the country. Students are admitted into this full-time program in their Junior year. The program strives to educate a new generation of health science graduates who are acutely aware of the interface between human genetic variability and drug action. Our mission is to offer a world-class education to students and equip future pharmacists, scientists, physicians, policy makers and health care professionals with concrete knowledge and unparalleled experience in pharmacogenomics. Our graduates play integral roles in the resolution of the scientific, policy and ethical issues surrounding personalized medicine. The program will uniquely prepare individuals for a variety of positions in the biopharmaceutical industry and allied health professions as well as continued advanced education in health policy, medicine, pharmacological/genomic research and pharmacy.
