Proper Citation: Institute of Medical Psychology and Behavioral Neurobiology, University of Tbingen (RRID:SCR_008011)

Description: The Institute of Medical Psychology and Behavioral Neurobiology in Germany is an institutional portal established at the Faculty of Medicine of the University of Tbingen in 1993. With the assignment of the chair for Medical Psychology and Medical Sociology to Professor Birbaumer the educational task became the instruction of medical students in Medical Psychology and Medical Sociology. Christoph-Dornier-Center of Clinical Psychology at the University of Tbingen Medical Faculty In March 2001, a new institute of the Christoph Dornier Foundation was opened under the direction of Prof. Niels Birbaumer. The aim of this institute is to advance research in behavioral neurobiology and behavioral medicine. The results of the research should be directly translated into treatments. The emphasis in Tbingen is on the treatment of chronic pain and intractable epilepsy, using a combination of biofeedback training and behavioral therapy. Even though a positive effect of biofeedback has been proven in many controlled studies, the method is still far from being accepted in everyday clinical practice. The outpatient department in Tbingen intends to enable access to this treatment to a wider population of patients. Magnetoencephalography(MEG)-Center The MEG-Center (established 1997) is a central research facility at the University of Tbingen. The Center is operated by the Institute of medical psychology and behavioural Neurobiology and hosts a whole-head 151-channel system built by VSM Medtech (www.vsmmedtech.com). In early 2006 in addition to the wholehead MEG an additional special purpose MEG system will be installed in Tbingen (funded by the DFG and Land Baden Wrttemberg). This MEG is dedicated to the investigation of fetal brain signals in utero (fMEG) . The fMEG will be installed at the University Woman Clinic and operated by the staff of the MEG center. This is the first dedicated fMEG system in Europe. Some content on the website is only in

German.
