Proper Citation: LDDMM (RRID:SCR_009590)

Description: Software application which aims to assign metric distances on the space of anatomical images in Computational Anatomy thereby allowing for the direct comparison and quantization of morphometric changes in shapes. As part of these efforts the Center for Imaging Science at Johns Hopkins University developed techniques to not only compare images, but also to visualize the changes and differences. For additional information please refer to: Faisal Beg, Michael Miller, Alain Trouve, and Laurent Younes. Computing Large Deformation Metric Mappings via Geodesic Flows of Diffeomorphisms. International Journal of Computer Vision, Volume 61, Issue 2; February 2005. M.I. Miller and A. Trouve and L. Younes, On the Metrics and Euler-Lagrange Equations of Computational Anatomy, Annual Review of biomedical Engineering, 4:375-405, 2002. Software developed with support from National Institutes of Health NCRR grant P41 RR15241.

Abbreviations: LDDMM

Synonyms: Large Deformation Diffeomorphic Metric Mapping

Resource Type: software resource, software application

Keywords: analyze, c++, console (text based), linux, microsoft, magnetic resonance, posix/unix-like, shape analysis, win32 (ms windows), windows

Funding:

Resource Name: LDDMM

Resource ID: SCR_009590

Alternate IDs: nlx_155780

Alternate URLs: http://www.nitrc.org/projects/lddmm-volume

Record Creation Time: 20220129T080253+0000

Record Last Update: 20250416T063553+0000

Ratings and Alerts

No rating or validation information has been found for LDDMM.

No alerts have been found for LDDMM.
