# **HMS NERCE Confocal Microscope Resource**

RRID:SCR 009805

Type: Tool

## **Proper Citation**

HMS NERCE Confocal Microscope Resource (RRID:SCR\_009805)

#### **Resource Information**

**URL:** http://harvard.eagle-i.net/i/00000130-08de-721d-de5a-673e80000000

**Proper Citation:** HMS NERCE Confocal Microscope Resource (RRID:SCR\_009805)

**Description:** Core facility that provides the following services: Confocal microscopy.

Confocal microscopy offers multiple benefits compared to conventional microscopy, particularly the ability to collect serial, high-resolution optical sections from thick specimens. Multicolor, three-dimensional images can be obtained, providing high-content information from single images. To assist NERCE investigators from throughout the region, NERCE has established a Confocal Microscope Facility at the University of Massachusetts Medical School. Funding through the NERCE has procured a state-of-the-art LEICA SP2 AOBS laser scanning confocal microscope, which combines spectrophotometric detection with confocal microscopy. The instrument is located at the BL2+ facility at the Lazare Research Building, at the University of Massachusetts Medical School, Worcester, MA. The use of live cell imaging combined with green fluorescent protein (GFP) technology is an exciting methodology with which to study the interactions between infectious agents and living cells. A variety of applications are amenable to confocal microscopy techniques and include: monitoring the localization of proteins in living or fixed cells, monitoring changes in the cellular distribution of proteins, and monitoring changes in the activation status and morphological changes in cells exposed to infectious agents.

Resource Type: service resource, core facility, access service resource

**Keywords:** confocal microscopy, fast live imaging

**Funding:** 

Resource Name: HMS NERCE Confocal Microscope Resource

Resource ID: SCR\_009805

Alternate IDs: nlx\_156272
