Proper Citation: Oregon Stem Cell Center Monoclonal Antibody Core (RRID:SCR_009997)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on December 6, 2022. Core facility that provides the following services: Monoclonal antibody development. The Oregon Stem Cell Center Monoclonal Antibody Core is focused on developing monoclonal antibodies that aid investigators in the identification and isolation of novel stem and progenitor cell populations. To enable isolation of live stem cells, personnel within the Monoclonal Antibody Core develop monoclonal antibodies directed against cell surface antigens. Personnel within the laboratory are highly skilled in all aspects of monoclonal antibody generation and characterization, and work closely with investigators throughout the entire immunization, fusion, and screening process. The monoclonal antibody core offers a full complement of services related to the development of monoclonal antibodies.
