Description: Core facility that provides the following services: Brain MRI service. Researchers in the Neuroscience and Magnetic Resonance Research Program are using a research dedicated 3-Tesla scanner to study the human brain and brain diseases. Facilities: The Magnetic Resonance (MR) Processing Core serves the needs of researchers in the MR Research Facility at Queen''s Hospital. Specifically, the MR Image Processing Core provides image processing support, infrastructure development, methodological development and training; expertise is available.

Resource Type: access service resource, core facility, service resource

Keywords: magnetic resonance imaging
