Proper Citation: UH Manoa Genomics Shared Resource Core Facility (RRID:SCR_010096)

Description: Core facility that provides the following services: DNA and RNA quantification service, DNA quality analysis service, RNA quality analysis service, Genotyping service, Gene expression analysis and DNA copy number analysis service, Pyrosequencing service. The purpose of the Genomics Shared Resource (GSR) laboratory is to provide expertise in the fast developing area of genomic analysis. In response to a growing need for genotyping services by a number of UH Cancer Center investigators, this laboratory was converted into a UH Cancer Center Shared Resource in 1999. Its current mission is to provide nucleic acid extraction, genotyping and expression profiling services in support of the peer-reviewed and IRB-approved research conducted by UH Cancer Center members.

Abbreviations: UH Manoa GSR Core Facility

Resource Type: access service resource, core facility, service resource

Keywords: dna quantitation assay, rna quantitation assay, dna quality analysis, rna quality analysis, genotyping assay, gene expression analysis assay, pyrosequencing
