## Laboratory of Phil Green at Univeristy of Washington

RRID:SCR\_010252

Type: Tool

### Proper Citation

Laboratory of Phil Green at Univeristy of Washington (RRID:SCR\_010252)

### Resource Information

**URL:** <http://www.gs.washington.edu/faculty/green.htm>

**Proper Citation:** Laboratory of Phil Green at Univeristy of Washington (RRID:SCR\_010252)

**Description:** Lab portal that contains software including Phred, Phrap, Consed. Our broad research goal is to help provide the computational methods necessary to achieve a complete, quantitative understanding of how cells function at the molecular level. Such an understanding will require three things: a parts list, or catalogue of all cellular molecules; a wiring diagram that specifies the interactions that occur between those molecules; and, finally, quantitative models of systems of interacting molecules. The advent of large-scale genome sequencing is bringing the possibility of completing the parts list within view, although substantial work remains to be done. Most current research in molecular biology is directed at filling the wiring diagram (which may be taken as specifying molecular function). The modeling of molecular systems, still in its infancy, will become increasingly important as the wiring diagram approaches completion and our ability to accurately quantitate cellular molecules improve.

**Resource Type:** organization portal, data or information resource, laboratory portal, portal, software resource

**Funding:**

**Resource Name:** Laboratory of Phil Green at Univeristy of Washington

**Resource ID:** SCR\_010252

**Alternate IDs:** nlx\_156897

**Record Creation Time:** 20220129T080257+0000

**Record Last Update:** 20250417T065350+0000
