Proper Citation: CONICET (RRID:SCR_011168)

Description: The CONICET is the leading organization dedicated to the promotion of science and technology in Argentina. It operates in four major areas * agricultural sciences, engineering and materials * life sciences and health * natural sciences * Social Sciences and Humanities The National Scientific and Technical Research Council (Spanish: Consejo Nacional de Investigaciones Científicas y Técnicas, CONICET) is an Argentine government agency which directs and co-ordinates most of the scientific and technical research done in universities and institutes. It was established on 5 February 1958 by a decree of the national government. Its first director was Medicine Nobel Prize Bernardo A. Houssay. Nowadays, it is governed by a board completely independent from the federal government. It funds scientific research in three basic ways. First, CONICET gives grants for collective work to research teams of well-recognized scientists of every discipline (including social sciences and humanities). Secondly, it has a roll of 6,500 researches and 2,500 technicians as employees in different categories, from investigador asistente to investigador principal. And thirdly, it grants scholarships for doctoral and post-doctoral studies to 8,500 young researches from Argentina and other countries. (Wikipedia)

Abbreviations: CONICET

Synonyms: National Council of Scientific and Technical Research (Argentina), National Council of Scientific and Technical Research, Consejo Nacional de Investigaciones Científicas y Técnicas

Resource Type: government granting agency

Resource Name: CONICET

Resource ID: SCR_011168

Alternate IDs: nlx_143717
